THE SOLAR ENERGY EXPERTS

**ARCH ELECTRIC**  
THE SOLAR ENERGY EXPERTS

46 member-owner solar  
CO-OP based in 31  
states, Puerto Rico, and  
Canada.

375kW Largest Institutional PV system at the time of construction...

1.7MW under construction

- Privately-held, independent developer of utility-scale solar projects nationwide, primarily focusing on 1-20MW
- Comprehensive pre-construction development platform consistently delivers low-cost, low-risk projects
- Certified B-Corp meeting rigorous standards of business, social, and environmental performance, accountability, and transparency

## Organic Valley – UMMEG Partnership

- Organic Valley had a desire to achieve 100% renewable electricity
- UMMEG utilities were interested in low-cost, local solar that would help to stabilize rates and hedge against electricity price increases
- OneEnergy had a conviction that they could achieve both goals by aggregating smaller 1-6MW projects into a larger portfolio to achieve economies of scale
- 10 projects in WI, SE MN and IA with total capacity of ~30MWdc
  - UMMEG utilities to buy energy and capacity for 25 years
  - OV to buy RECs for ~13MW for 25 years, which will bring them to 100% renewable
  - Remaining 17MW of RECs still available

THANK YOU.
